

DID YOU KNOW WE “RENT” OUR MONEY ?

Christopher Krebs
General Chairman
National Socialist American Labor Party

**“Permit me to issue and control the money of a nation, and I care not who makes its laws.”
Mayer Amschel Rothschild**

The most popular misconception made by most people today when discussing the collapse of the American economy, the incredible corruption of Corporate America and Wall Street, and the resulting downfall of the American Middle Class by way of foreclosures, loss of employment, and predatory banking practices is to refer to “Money” or Federal Reserve Notes, currently in circulation as so-called “legal tender”, as “**Our Money**” .

In reality all Federal Reserve Notes/Money is the private-property of the privately owned Federal Reserve Bank, which is essentially the local branch office of the privately owned jewish Rothschild Bank of England. The actual “owners” of the so-called money-in-circulation are a consortium of international banking cartels, eight to be exact. These owners of the Federal Reserve Bank are as follows:

Rothschild Banks of London and Berlin (about 60% ownership)

Lazard Brothers Banks of Paris

Israel Moses Seif Banks of Italy;

Warburg Bank of Hamburg and Amsterdam

Kuhn, Loeb Bank of New York (American Express)

Goldman, Sachs of New York

National Bank of Commerce NY/Morgan Guaranty Trust/J. P. Morgan

Bank - Equitable Life - Levi P. Morton are principal shareholders

Hanover Trust of NY (William and David Rockefeller & Chase National Bank NY are principal shareholders)

Those in control of Wall Street and hence the Government of the United States are these **Israeli-Citizens:**

Ben Shalom Bernanke: Board of Governors of Federal Reserve

Donald L. Kohn: Board of Governors of Federal Reserve

Randall S. Kroszner: Board of Governors of Federal Reserve;

Frederic S. Mishkin: Board of Governors of Federal Reserve

Alan Greenspan: Advisor to Board of Governors of Federal Reserve – Recent Chairman

The last time our money was in circulation was in 1963 when the \$2 Bill was in circulation as a "**United States Note**" via Executive Order of President John F. Kennedy, shortly before he was assassinated.

The first Executive Order signed by President Lyndon B. Johnson upon, following the assassination of Kennedy, was to rescind both the "Lincoln Silver Certificates", as United States Notes, and the Kennedy "Two-Dollar Bills", as United States Notes, and leave only Federal Reserve Notes in circulation as ***so-called***, "legal tender". The money of "We the People" has historically always been United States Notes, when that money has been paper. At all other times, since 1913, paper-money is the private-property of the Federal Reserve Board when it declares on its face to be a Federal Reserve Note, and like most private property, when ***rented***, involves a ***surcharge/usury-tax***, in this case the Income Tax of the IRS, the collection agency for the Federal Reserve Board. The "rental fee" for each Federal Reserve Note in circulation is for our individual use of their private property, as well as the collective use via the expenditures & appropriations made by our Congress. The "rental fee" is taken out of our paychecks each pay period as well as on April 15th of each year and it's what constitutes the National Debt" and **THIS WILL BE REPUDIATED BY A NATIONAL SOCIALIST GOVERNMENT.**

The irony of the Wall Street Bailout is the actual owners of the Federal Reserve Board are actually crediting and giving funds to themselves and charging interest / usury to the American People at the same time. How very jewish. That's why there is no oversight taking place, and why the Federal Reserve Board has opposed a Congressional Bill that would Audit the Federal Reserve, even after over \$2 trillion has been distributed among themselves so far equaling \$800K per/employee on Wall Street this year alone. It costs no more than 3¢ to print a \$1 bill and 3¢ to print a \$100 bill so which do you think carries the highest interest/usury rate?

Consider that \$10K = 100 / \$100 bills a ½ inch thick; \$1 MILLION = 100 packets of \$10K; \$100 Million = A full standard-size pallet; \$1 BILLION = 10 standard-size pallets of \$100 Million each; and \$1 TRILLION = A football field of double-stacked standard-size pallets of \$100 Million each! And we the "taxpayers" are being charged the Interest/Usury rate for each \$100 bill in those double-stacked pallets on that football field! Is it time to repudiate the National Debt and imprison and/or execute these traitors and restore the U.S. Treasury and Banking system to a fair and equitable system that serves the American Community as a whole and not the self interests of jewish corporate international interests.
