

The National Socialist American Labor Party

NSALP.org

What is National Socialism?

Without a doubt the most notorious and well known example of National Socialism is Nazi Germany. In the U.S. we learn from the time we are old enough to read that Nazism is evil. The concept however is never explained to us. The ideology of National Socialism has absolutely nothing to do with racial supremacy or hatred but rather two concepts nationalism and socialism.

The very first things that may have caught your attention are the words socialism and labor. We are not used to hearing those two words in American politics. Socialism is actually the older, protective brother of the laborer. The concept was derived from the need to protect the average, everyday worker from the abuses of a capitalist system. In America today we are forced to live under a capitalist for profit system. Under a socialized economy we would have a for use system; instead of manufacturing goods for profit we manufacture them for use by the American people.

The other ideology we are committed to is Nationalism, American Nationalism. This simply means we are dedicated to preserving American culture and traditions. Unlike the mainstream parties in the U.S today, the

NSALP's politicians if elected will work diligently to fight for the American way of life.

American National Socialism:

A National Socialist America will benefit from the experiences, the mistakes and successes of the countries who built National Socialism. It will reflect the distinctive features of American development, environment and culture.

America has unique historical advantages such as: unequaled natural resources, fertile soil and perfect weather; coupled with the contributions of generations of working people that enabled the United States to achieve higher productive levels and living standards than other countries. Likewise, the development of National Socialism in America will have distinct advantages.

We have a highly developed industrial society with a highly trained and educated work force.

National Socialist America will avoid the terrible problems of extreme poverty, illiteracy, civil wars, wars of intervention and world wars. A National Socialist America will

extend democracy to its fullest, taking, as its starting point, the democratic traditions and institutions of the American people.

What are the goals of an American National Socialist Society?

A life free of economic exploitation

Ending economic insecurity

Ending poverty

An end to unemployment

An end to hunger and homelessness caused by predatory banking practices

An end to all forms of racism, government oppression, and government against our people

Renewal and extension of people and families

Ending the rule of corporations over our government policy

An end to private ownership of public resources such as utilities

Creation of a rationally planned economy that will stimulate a thriving economy that is based on the American Worker and America itself

Ending the practice of “Internationalism” that has led to our current state of economic recession

These goals can be realized, but only through National Socialism which is not corrupted by corporate and international special interests.

An Alternative to Our Current System

We are lead to believe that our country is a two party system. This is not true- America is a multi -party system. The fact is our nation may have two main parties but any party is free to participate in elections. In an effort to maintain a monopoly on power, the mainstream media and parties have blurred this reality. The NSALP is an alternative third party that will compete with the Democrats and Republicans on Election Day. An unfortunate reality is you really do not have to go far to find other “parties” that say they share our values. These parties brandishing the same symbols and ideology have done nothing but cause problems. The NSALP are not a band of hoodlums or thugs that march and cause a scene; we are well rounded, educated individuals who will stand up for Americans on Capitol Hill.

Why Should You Join The NSALP?

Now that we have cleared up the common misconceptions of our ideology; you may still be thinking why should I join the NSALP? Forget we are in the middle of an economic recession; our American culture is under attack. Every day in our schools throughout our great nation YOUR children are being taught an entirely different history of America. Our entire culture in our own nation is in jeopardy of vanishing. The NSALP will fight to make sure our history is not forgotten or left out of the textbooks. We are committed to maintaining English as our common language, protecting the sanctity of marriage based on one man and one woman, and protect Americans rights to keep and bear arms. These liberties are slowly disappearing but there is no need to despair.

Now is the time to work towards a new future, a future in which your freedom is protected, your rights guaranteed, and justice is restored to our great nation. Enlist in a new American revolution at the ballot box-- *Get involved today!*
